jasonjb82

I am a geospatial professional with more than 14 years of experience. My greatest interest and strength is in using geospatial, business intelligence and data analytical tools to understand better and solve spatial and non-spatially related real world problems and to subsequently present this using high-quality mapping or data visualization outputs.

## EDUCATION

2000-2004  
University Technology Malaysia

### BSc (Hons), Major in Remote Sensing

Dissertation: The application of Remote Sensing and GIS for the development of a Fire Mapping Database

## EXPERIENCE

January 2016 – Present  
The Forest Trust, Malaysia

### Project Lead – Data Analytics & Visualization

Spatial analysis for risk mapping, supply chain mapping, field data collection and mapping support for assessments and smallholder farmers engagement programme, geo-database management and development. Data processing, analysis and visualization using R and business intelligence tools.

July 2015 – December 2016  
ERE Consulting, Malaysia

### Senior GIS Consultant

Spatial analysis and mapping for environmental assessments.

August 2013 – June 2015  
WorldFish, Malaysia

### Geospatial Data Analyst

Data collation, mapping, spatial analysis, visualization, web mapping using open-source tools (OpenGeo suite, R) with focus on sustainable fisheries, natural resources management, climate change and food security.

July 2007 – June 2013  
GHD, Malaysia and South Australia

### GIS Analyst

Data collation, geo-database development, mapping, spatial and 3D analysis. Field data collection support, Develop decision support systems using GIS and remote sensing data.

July 2006 – June 2007  
Sapura Kencana Petroleum, Malaysia

### Data Processor

Data processing and mapping of offshore survey data.

May 2005 – June 2006  
MapIT, Malaysia

### Mapping Officer

Business geographics, cartographic solutions for location-based services, geospatial data collation.

May 2004 – April 2005  
Ground Data Solutions, Malaysia

### Geomatic Data Analyst

LiDAR data acquisition, processing and mapping to produce high-resolution Digital Terrain Models and orthoimagery for various sites in Peninsular Malaysia and Central Kalimantan, Indonesia.

COURSES / TRAININGS

Fundamentals of Data Analytics - by BFM-Edge and Fusionex, Kuala Lumpur (2017)

Climate Data Analysis and Vegetation Monitoring using R - Joint Graduate School of Energy and Environment, King Mongkut's University of Technology Thonburi, Thailand (2014)

Remote Sensing for Habitat Conservation - University of Nottingham Malaysia Campus (2014)

GIS for Species Distribution Modeling - University of Nottingham Malaysia Campus (2014)
